

UMBRELLAS

Our collection of umbrellas include:

- *Umbrellas for swimming-pools/beaches*
- *Big umbrellas for terraces. Restaurants, solarium.*

Our umbrellas are projected and produced considering their final use from touristic operator.

Shortly, to be functional, they have to be easy to open, which waterproof and anti-mould fabric, a strong frame which can be resistant to a normal wind and, above all, which don't need particular maintenance.

To have this features, range of our products is produced using these materials:

-ALUMINIUM with treatment of anodization (to be resistant on seashores where there is salinity on material).

-Rivets in inox steel aisi 304/312

-Acrylic fabrics treated for anti-mould and resistance to sun light (fastness 7/8), with weight of fabric from gr.190 to gr.340/sqm.

Many attentions are used in umbrellas manufacturing to make umbrellas even more resistant to wind and outdoor using.

A big range of finitures of fabric allows to offer various models which are easy to integrate in various sides. In particular, *Big Umbrellas serie* is offered in a big range of solutions which allow to cover also sqm 36 with a single umbrella (mod.Albetross).

On all umbrellas it's possible to make personalization of customer directly on fabric
